

COMPLETE FOUNTAIN NS-500

Information

Artical Numbers:

▶ NS-500/CJ

Description

Complete fountain kits ideal for areas that need an intense, impressive decoration. Each kit includes all the necessary fountain units to form a complete fountain ready for operation. The kit is structured on a round-shaped base equipped with five lights units and one fountain nozzle. The base is made of stainless steel material. Special legs installed on the base are adjusting the height of the fountain kit. The fountain nozzle can be selected by a number of different nozzles such as turning jet, mushroom jet, morning Glory, surface aerating jet, de lis jet, smooth bore jet, mushroom family and cas cade family. All of them produce unique water effects illuminated by five lights of 120W each. The kit is powered by a stainless steel submersible pump of 1,20 KW that will eject the water stream 1,80m up in the air. Control panel and cable are also provided. NS-500 is ideal for big sized fountains and is usually chosen to decorate hotels and glamorous entrances because of the stunning colour effects that lighten the water's dancing.
